# KHALIFAH EDUCATION FOUNDATION

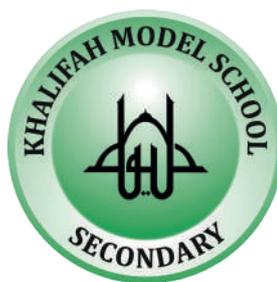

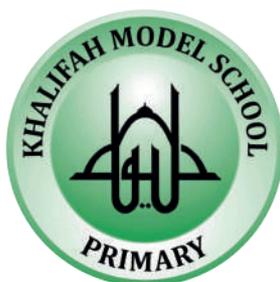

Established in October 2012, Khalifah Education Foundation is a non-profit organization that governs two schools and one training academy namely Khalifah Model School (Primary), Khalifah Model School (Secondary), and Khalifah Training Academy.

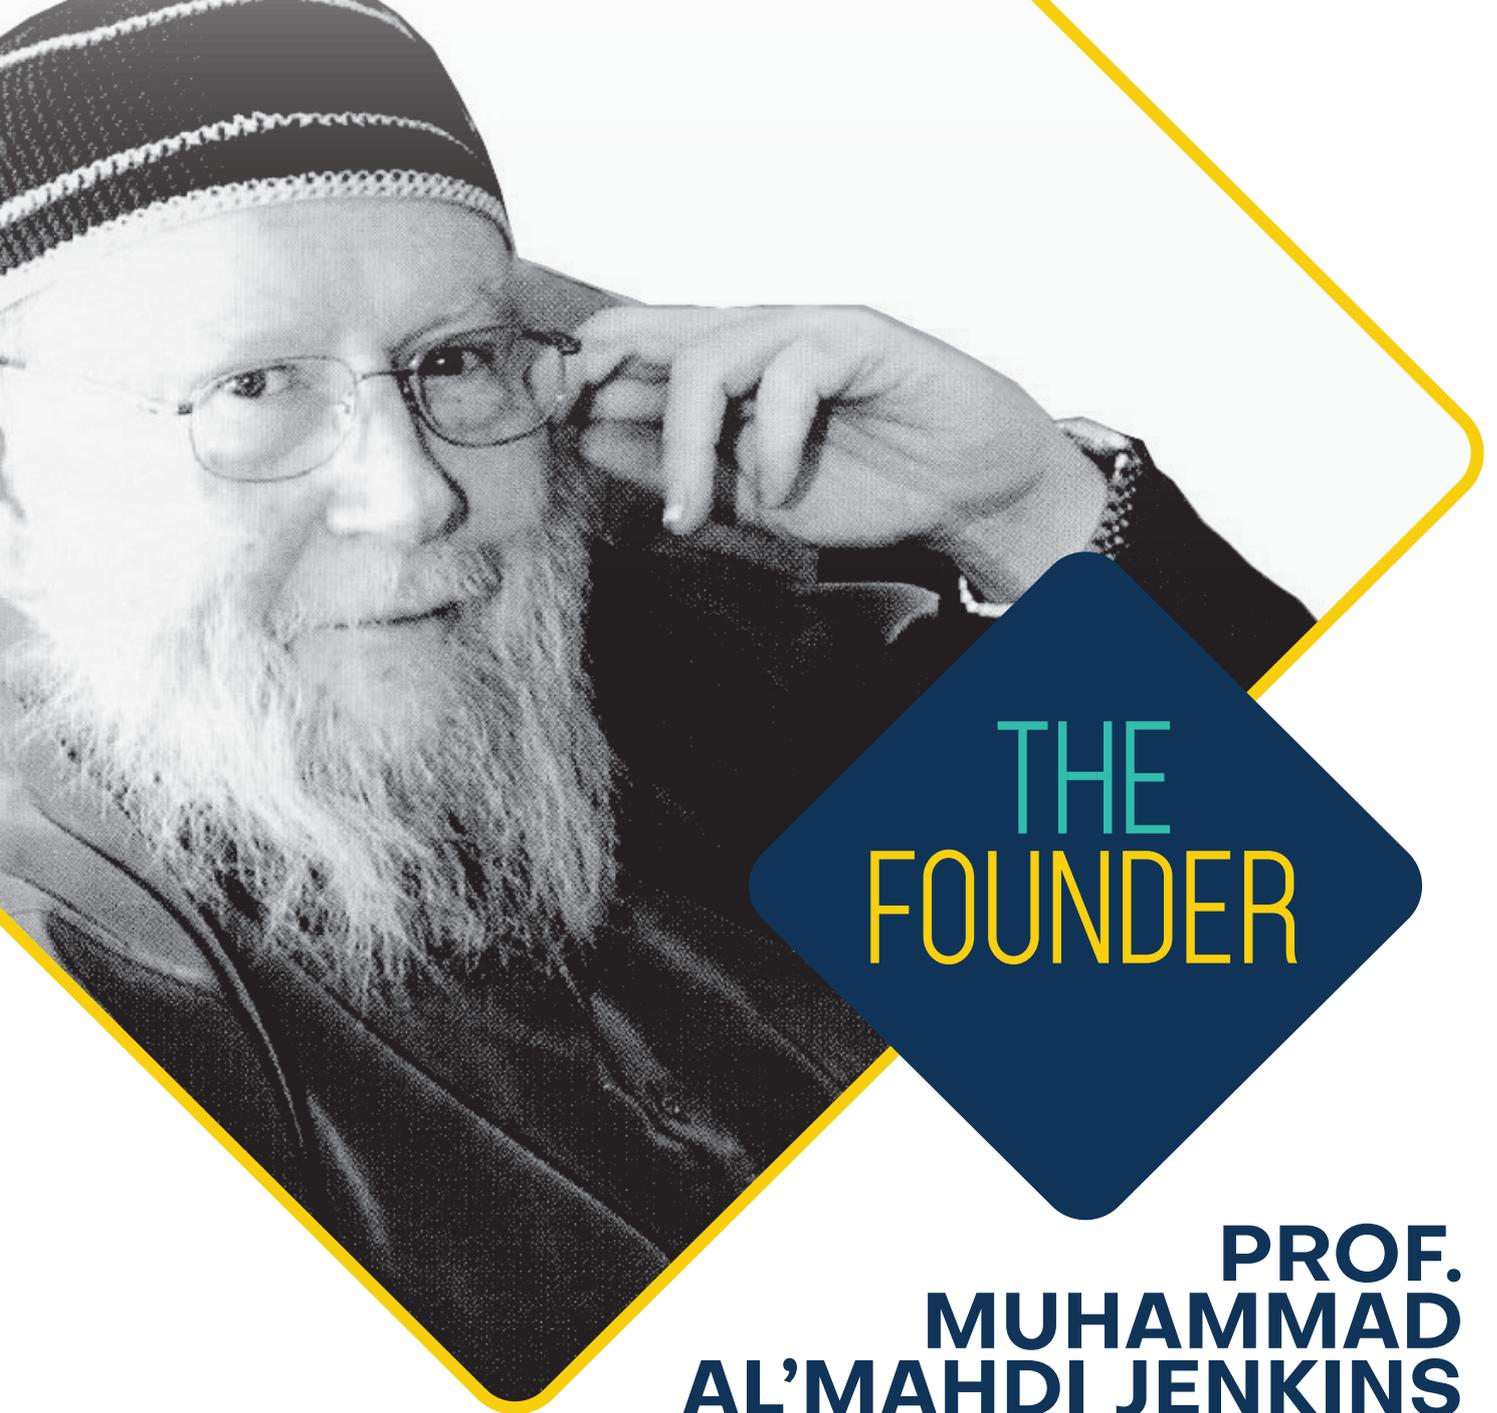

The Foundation's main project has been the establishment of the abovementioned schools, with its vision to make Khalifah Education Foundation a model institution that is successful in shaping a society that is excellent in faith, knowledge, action and character through the implementation of Khalifah Method. Khalifah Method is being comprehensively used by all teachers in all interactions with the students to achieve excellence in academics, character, and spirituality. Through this method, students will develop a deep love for Allah and Islam, and will be naturally inclined to do good and abstain from evil, besides being taught to become people of deep learning and understanding i.e. UlulAlbab. It is our hope that by 2020, both the primary and secondary Khalifah Model Schools will become premiere integrated Islamic schools well known in Malaysia as well as internationally.

The Foundation is spearheaded by members of the society who strongly believe in Education as a means to produce a transforming generation that propels the nation towards success and excellence. Members of the Board of Trustees and Working Committee come from various fields of profession, whose mutual interest is purely in the instillation of good values in the nation's future generation. It is through education that this agenda can be carried out at its core level.

## THE FOUNDER

### **PROF. MUHAMMAD AL'MAHDI JENKINS**

Khalifah Method was founded by the late Prof. Muhammad Al'Mahdi Jenkins who held doctorate degrees in Child, Clinical, and Experimental Psychology as well as trained in nuclear electronics. His dedication to science and truth led him towards the conviction that God exists and eventually to Islam. Through his extensive research and knowledge, he formulated Khalifah Method, a powerful tool to shape the society towards excellence.

Leaving the USA in search of God, Prof. Muhammad eventually settled down in Malaysia in the 1990's after travelling the world. Having been to many countries, he saw that Malaysia has the potential to become a model for other countries to emulate as it has been a success story among the Muslim countries. He has since set up Khalifah Institute in 2004 as a platform to disseminate Khalifah Method and upon his demise, this effort is continued and propagated till this day by Khalifah Education Foundation.

Prof. Muhammad established KMS in 2006 and aspired to make it a model community school that provides good quality education which focuses on character, spiritual and academic excellence. Subsequently KMSS was established in 2013 as a continuation of the primary school, upholding the same aspiration and objectives.

Alhamdulillah, solātan wa salāman 'alā Rasulillāh. Ammā ba'du.

In tracking what people think and say about schooling and education, most of the conversation is about means, rarely about ends. It is something I always remember from what Neil Postman stated in his book, *The End of Education*. Exams, standardization, technology, grades, ranking, what to teach, what to learn, and so on. Some of these questions are interesting and some are not. But what they have in common is that they evade the issue of what schools are for. It is as if we are a nation of technicians, consumed by our expertise in how something should be done, afraid or incapable of thinking about WHY.

WHY, is not a question to be answered by what our qualification and field of expertise. It is a question of a worldview, how we perceive ourselves, the creations around us and life as a whole.

Khalifah Model School (Secondary) is not just another school. It was the school that convinced me to become a full-time educator, believing that education, is the road ought to choose for islah.

Adam 'alayhi al-Salam was chosen to bear the responsibility of being the Khalifah of Allah, despite the risk of mischief and bloodshed, because Adam is different but unique. He is the thinking being, the learning being, so as his descendance. The ability to think, creating meanings, constructing knowledge, expanding understanding and application are what made Adam, the Khalifah.

The true meaning of education, has to remove the confrontation between the 'natural' child and 'unnatural' schooling, making both school and home as the natural environment of learning for our young Khalifah, synergizing parents and teachers to support learning in school as the holistic and universal model of learning. Khalifah Method expands the application from not only shaping excellent character as emphasized at primary school level, but also integrating subjects and fields of knowledge, at the epistemology level in the most organic way, to achieve the oneness of both Syariatullah and Sunnatullah in the essence of Tawheed.

Khalifah Model School (Secondary) is modelling an education system, beyond schooling.

To Allah we place our faith, in upholding teaching and guiding our young Khalifah, as His trust.

Siru 'alā barakatillāh.

# OUR ASPIRATION

We aspire to play a significant role in building the country's human capital by offering and sharing the Khalifah Method approach in a school setting through experience and skills transfer to other schools. We also wish to open our doors for many more students to benefit from our system.

We aspire to make KMS a model community school, well equipped with proper infrastructure, whereby education is made available and accessible regardless of one's socioeconomic status. We hope to achieve this through smart partnerships with members of the community and corporate organizations.

We aspire to eventually raise a transforming generation that will propel the society towards a world where its citizens embrace all that is good and live a life of excellence.

## VISION

**To be a premiere school in utilizing Khalifah Method in raising children to be excellent Muslims.**

## MISSION

**To shape students towards excellence:**

- **High taqwa**
- **Motivated to learn**
- **Choose to do good**
- **Refrain from wrong**

## MOTTO

**Shaping Excellent Character**

At Khalifah Model School, we don't just teach our students how to count. **But we guide them to be accountable and show them what counts.**

# KHALIFAH METHOD

The Khalifah Method is an approach that is developed based on the premise that if any individual or social group is given two things, that individual or social group will naturally and inevitably move toward everything that is good and right. The two things are:

1. A positive, accurate and motivational worldview, which is Islam that is rightly understood and practised. Focusing on our role as khalifah of Allah is a strong motivating factor in this worldview.
2. A good and broad understanding of the Laws of Learning by which all human characteristics are developed.

The Khalifah Method constitutes three pillars, which, if internalized in our interaction with our children (and other individuals around us), is effective in raising children to become good and responsible individuals. Inevitably, we will develop a society that loves everything that Allah has made right for us and dislikes everything that Allah has told us is wrong.

## ▶ THE THREE KHALIFAH METHOD PILLARS:

1. Instill deeply love for Allah and Rasulullah (sallallahu alaihi wasallam). Teach our children (and people around us) about their role and responsibilities as a khalifah of Allah. Do it in a way that allows them to develop a deep love for this role and seeing it as an honour. Carrying out their khalifah responsibilities then becomes fun, meaningful and will come naturally and instinctively.

2. Find different ways to reward our children (and the people around us) for any good behavior displayed. Reward them also when they refrain from bad behavior. This is done daily through mainly warm praises, appreciation and attention. Done this way will bring about a love for good behavior and disdain for bad behavior.

3. Set firm reasonable rules for our children, and explain the reasons for these rules. Apply these rules consistently with 'kind discipline', which means without harshness. This is the Sunnah of our beloved Prophet Muhammad (sallallahu alaihi wasallam).
